04-12-2/1 vidhya nagar, revenue ward no-2, ponnur, Guntur , Andhra Pradesh

Summary

- Ambitious 4th-year Computer science student with a strong focus on Artificial intelligence and machine learning
- Gained hands on experience with python based-machine learning algorithms and data analysis
- Committed to continuous learning and contributing to innovative technological solutions

Skills

- **Programming:** Python, Java, C
- **Web Development:** Django, Flask, HTML, CSS, JavaScript
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, GitHub
- **Languages:** Telugu, English , Hindi

Certifications

- **Machine Learning with python** - APSCHE, 2024
- **Generative AI in action** - IBM, 2024
- **AI Associate -Trailhead-** SALESFORCE,2024

Education

Narayana E-Techno School – (2020/04)

Class 10th, ponnur

- percentage : 92 %

Viveka Junior College – (2020/08 – 2022/06)

Class 12th, ponnur

- Percentage: 79%

R v institute of technology -JNTUK- (2022/08 – present)

Bachelor of Technology in computer science engineering

- Specialization: Artificial intelligence & Machine learning
- CGPA: 7.76

Projects

Emotion Classification using Audio – (2024/08 – 2024/11)

- Developed a model using Hugging Face Transformers to detect human emotions (e.g., angry, happy, sad) based on live audio input.
- Created an interactive interface for emotion detection using Streamlit for real-time audio analysis.
- Achieved real-time emotion classification through voice, with the output displayed on the interface for better user interaction and experience.

Pet Adoption Using Django – (23/08 – 23/011)

- Designed and deployed a scalable Django web application to simplify the pet adoption process by connecting seekers with shelters.
- Focused on promoting animal welfare by making the adoption process user-friendly and efficient.

Flask-based Task Management Application – (2024/04 – 2024/07)

- Created a responsive web application using Flask and SQLAlchemy
- Implemented CRUD operations for task management with user authentication
- Utilized Git for version control and collaborative development
- Deployed the application on Heroku for easy access and testing

Internships

Full Stack Intern - BLACKBUCKS- (2023/05- 2023/07)

- Completed a comprehensive 10-week virtual internship on java full-stack developement
- Gained hands-on experience with frontend technologies like angular react and javascript
- Developed and deployed scalable web applications using springboot
- Participated in collaborative projects simulating real-world cloud migration scenarios

Genrative AI Intern-SmartBridge & APSCHE (2024/10 - 2024/11)

- Completed 2 months internship in Generative AI using IBM cloud
- Used IBM WATSON studio to build ,train and to deploy AI models
- Studied how generated models like chatgpt and IBM Watsonx.ai function

Extra-curricular Activities

- **Director of Technology, Intelligentsia Club :** Lead technology initiatives, guiding a team of 15+ students in organizing workshops, coding competitions, and technical events.
- **Hackathon Participant:** Developed full-stack applications under time constraints, enhancing problem-solving skills
- **Social Internship:** Conducted a 10-day awareness program on smart village revolution in Chakrayapalem, developing empathy and communication skills
